EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Fagin on 11/25/03.

2. The application has been amended as follows:

Claim 1, line 21: --, said θ axis being an axis other than a central, rolling axis about which said attaching roller rolls-- was inserted after "position".

Claim 15, line 1: "11" was deleted and --1-- was inserted.

3. The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the prior art fails to teach or suggest a method for attaching an adhesive tape comprising, rolling an **attaching roller having an adhesive strength** on a non-adhesive surface of the adhesive tape so that the tape is transferred to the roller and rolling the roller on a surface of a **curved glass panel** so that the tape is transferred to the panel, wherein the roller is rolled onto a slanted upper or a slanted lower surface of the panel to transfer the adhesive tape to the slanted upper or lower surface, said method further comprising moving and/or rotating the roller along **at least a pair** of X, Y, Z, and θ axes to position and roll the roller on a surface of the panel, **said θ axis being an axis other than a central, rolling axis about which said roller rolls.**

JP 6-29332 to Ozawa (applied in previous office action) teaches moving an adhesive roller up and down (along Z axis) and rotating the roller about a θ axis (central, rolling axis about which roller rolls) to attach an adhesive label to a disk. Therefore, Ozawa fails to teach and/or suggest transferring a label to the slanted upper or lower surface of a curved glass panel by moving and/or rotating the roller along at least a pair of X, Y, Z, and θ axes to position and roll the roller, with the θ axis being an axis other than a central, rolling axis about which the roller rolls.

With respect to claim 16, please see p. 6 of Applicants arguments filed 10/10/03.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Jessica L. Rossi** whose telephone number is **703-305-5419** (571-272-1223 come mid December). The examiner can normally be reached on M-F (8:00-5:30) First Friday Off.
